#### **DETAILED ACTION**

### **Drawings**

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the protrusion being formed in an upper side of the notch as claimed in claim 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "17" and "31" have both been used to designate the pivot

Art Unit: 3616

in Fig. 4). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

# Specification

- 3. The disclosure is objected to because of the following informalities: on page 10 lines 8 & 18, "enough" should be deleted; on page 10 lines 20-22 should be deleted; on page 10 line 24 after "out", --in-- should be inserted. Appropriate correction is required.
- 4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: in claim 15 lines 13-15, "the predetermined ... fourth length".

#### Claim Objections

5. Claims 1-17 are objected to because of the following informalities: in claim 1 line 5, "a" should be changed to --an--; in claim 1 line 11, "adopted" should be changed to

Art Unit: 3616

--adapted--; in claim 5 line 5, "a" should be changed to --an--; in claim 5 line 11, "adopted" should be changed to --adapted--. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 7. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Satou et al. (U.S. Patent 6,726,248).
- 8. Regarding claim 1, Satou discloses an impact absorbing structure 101 as in the present invention comprising:
  - a steering shaft 109 having a longitudinal rigidity against compression;
- a steering column 121 having a longitudinal rigidity against compression, engaged coaxially and rigidly in an axial direction with the steering shaft 109;
- a pivot 153 rigidly attached to the steering column 121, to be an axis of a tilt rotation of the steering column;

an upper bracket 125 rigidly attached to the steering column 121 for temporarily allowing a tilt motion of the steering column, and adapted to be relatively moved away from a vehicle body 103 in response to an impact; and

Art Unit: 3616

a lower bracket 127 having a notch portion defining a notch 157 with an open end to a front of the vehicle body, rotatably engaged with the pivot in a closed end of the notch, for allowing the pivot being released from the notch in response to the impact (Figs. 18-30).

# Allowable Subject Matter

9. Claims 2-17 would be allowable if rewritten to overcome the objection(s) to the claims, specification, and/or drawing as set forth in this Office action and, as applicable, to include all of the limitations of the base claim and any intervening claims.

#### Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joselynn Y. Sliteris whose telephone number is 571-272-6675. The examiner can normally be reached on Mon, Thurs & Fri 8:30 am 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul N. Dickson can be reached on 571-272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
